### **The essence**

The theory of Velayat Fagih is the most important achievement of political thought of Shia School. This theory is as old as Shia Jurisprudence and it's been reflected in every Shia Jurisprudent word right from the beginning to the present to the extent that claiming the Velayat Fagih principle as prophet hood by the jurisprudents consensus cannot be a wrong claim. But just as much as the principle is taken for granted by every Shia jurisprudent there are discrepancies of ideas about the domain of power and authority of Velayat Fagih between these experts. The sum of these ideas can be listed as follow:  
1. Theory of litigious affairs, 2. Theory of common affairs, 3. Theory of absolute power of valayat.

Through study of reasoning's we understand that velayat of the prophet and Imams have been the absolute ones but velayat fagih is on common affaires only.
