Abstract:

This thesis is in the direction of explaining freedom based on the political opinion of Imam Khomeini (peace be upon him). This is a collection of important hypotheses and ideas that his excellency Imam has expressed regarding freedom particularly political one and after vast and examination and research and that was from all aspects and noting some findings of Imam Khomeini and in four chapters (general concepts, various and levels of freedom, bases of that, the domain and resources that determine the limit of that) I have reached the following comparatively general and coordinated and coherent results: freedom is among credited and normative subjects according to Imam Khomeini (peace be upon him) and while he supports that he recognizes it based on different levels including individual, social, cultural and political ones and choosing the goal of evaluating and teleology from the aspect of bases and choosing the goal of avoiding damaging Islam and Islamic system and Godly laws he determines the domain of that and he believes that within that determined limit it can be defended and he emphasizes that that in the framework of Islam and its laws is valuable and it is an asset.
