Abstract:

The idea ruling Iran's Islamic republic system and that comes from Imam Khomeini (peace be upon him) is rooted in the Quran and Mohammadi pure Islam. Hence the approach and the direction of the Quran and its original sources regarding power are based on religious values and stabilizing political power on humanity and morality. Based on that in our system acceptance of responsibility should not be a means for satisfying bodily inclinations such as worshiping rank and wanting to be famous and in fact responsibility should be a Godly trusteeship, doing the work and performance of duty. Because of that that outlook of those who are responsible turns the field of responsibilities into a scene of Jihad regarding what is in the path of God. Imam Khomeini and the leader Khamenei also have introduced the holy Islamic republic system as a meritorious backing system and they consider moral merits and the way of those who are responsible among the necessary axes for getting appointed in a suitable way regarding the rule. It is obvious that Imam Khomeini and the great leadership rank have emphasized that those who are responsible should possess Islamic morals and that not only leads to their well-being in this world and in the end but also it makes perfect and strengthens the political thoughts that rule the overseeing.

On the other hand as some of those who are responsible believe that they should not practically necessarily follow moral opinions of Imam Khomeini and the leader Khamenei leads to them having plagues, getting hurt and misuse that has to do with power and as such when they have power they get drunk and thus not only do they become drops of the system but also they may force that and the revolution to pay for some costs. Because of that it is completely necessary that those who are responsible pay continuous attention to the moral system of those great ones.

Thus noting the necessity of compilation and making vast the moral thoughts of Imam Khomeini and the rank of the great leader in the area of the morals of those who are responsible the researcher has examined the basic principles of the morals of them, the kinds of the morals of those who are responsible and the individual morals and that that is related to management morals of those who are responsible and their negative one... based on the view of those great ones and throughout this research work I have made an effort so that through making distinct the ideas, the thoughts and views regarding morals of Imam Khomeini and the rank of the great leader in the area of morals regarding ruling and morals of those who are responsible to make perfect the holy system of the Islamic republic and to modernize the society as far as moral is concerned.
