

# The Role & Impact of Islamic revolution on the Political literature and Culture of the World

By: Dr Taqi Bangash

## **Introduction:**

The Revolution exposed enormous intrigues hatched not only against the Muslim world but all the oppressed societies of the entire world.

*Shanakht-e-istikbar* is one of the greatest and one of the most valuable gift of the Islamic Revolution. It became so easy for the *mustazaafeen* of the world to recognize their powerful enemies. The revolution has deep global significance, affecting since 1979 the decades are dominated by

It is noteworthy that the secret documents tell a great deal about not only the shah's or American policies about Iran or the region only. The documents published by the revolutionary Iranian students in fact relate to the entire world including Pakistan and then USSR. Thus it was a great service to entire humanity that the Iranian students seized and published these thousands of documents which revealed secret plans of the CIA pertaining to many countries including the USSR, the arch rival of the USA. Secret documents related to Volumes were inaugurated

The revolution was the most valuable gift of knowledge and awareness. One could buy the secret documents of the world notorious CIA in the common and small shops and even footpaths of the streets of the Iranian towns and cities. It was a revolution of awareness for the *mazloom* peoples of the world.

The revolution witnessed remarkable administrative acumen, wisdom and efficiency which was incredible from the very early stages of the revolution proving to the future revolutionaries of the oppressed nations, societies and countries the path to glory, independence and salvation.

The Revolution is the latest chapter in the long historical process which had its origins in the national and religious inheritance of the Iranian people.

Heikal writes "...What happened in Iran affected all of us, so that it might now be not fanciful to apply to Iran the words which Napoleon applied to Egypt-'the most important country'."

The human potential of Islam increased vastly when the former Soviet Union broke up and a number of the Republics in the South began to view themselves as Islamic states.

## **Nest of Spies**

For the Americans, Tehran was the heart for control of the entire region. Iran became the police station, according to Heikal. It was the American embassy which became the police

station. The embassy compound became in effect the most important single spot in the whole of Iran. All the ambassadors who came to Iran after that had CIA connections, until in 1973, the logical conclusion was reached and the then head of the CIA, Richard Helms was appointed ambassador. The Shah used to see the head of the Tehran CIA station once a week.

The Revolution brainstormed new ideas across the globe particularly Original Documents from the Nest of spies was a major change in the political literature of the world which brought changes in the global behavior in diplomatic of the entire world particularly the USA. Publication of the dozens of bilingual volumes of the original documents. The English version of the documents was published in precisely original form. The publications have immense value for serious Historians to write original and unpolluted history.

The volumes exposed the dark designs of international intelligence like, Mossad, CIA, MI6, MI5 & KGB about the entire community of global States. The documents have unchangeable value for original documents. Scientific History is not possible without original documents. The Iranian students on the line of the Imam performed a globally unprecedented job of providing the thirsty scholars and masses belonging to almost all the societies around the world by providing these secret cables, telegrams and details of the dirty biographies of secret intelligence agents

The world would never be the same again after the Islamic Revolution in Iran *Sangare-sheeran*. The Revolution has reconfigured the political map of the world. The Revolution reflects the aspirations of the Muslims across the world who had felt subjugated, humiliated and frustrated by their bitterest experiences with the Western Civilization. The Revolution became a soothing balm on the Civilizational wounds of Muslims across the globe. Iran offered a specifically Islamic Model of socio-politico-economic developments absolutely uniquely independent from the Western materialistic influences of Judio-Christian Culture led by the American establishment. As USA has Satanic tendencies the seizure of the American embassy in Tehran was an event of paramount of positive global significance.

#### BOOKS:

Scholars, diplomats, professors, journalists from almost the entire world have written extensive books, journal & magazine articles about the Revolution which is one of the most significant development in the academic world. Despite enmity by the world's powerful countries like USSR, USA (so-called Super Powers) and Great Britain (a so-called ex-Superpower), ambassadors (to Tehran) of all these three countries wrote remarkable books on the Islamic Revolution. Ambassador of USA, Sullivan was so annoyed with the policies of USA that he resigned from service as he seriously opposed his own Foreign Office regarding stupid American foreign policy towards Iran. Sir Anthony Parsons, Ambassador Britain wrote

*Fall of the Peacock Throne* and the ambassador of USSR also wrote a book on the Revolution.

An American Supreme Court judge Mr. Carlson who came to Tehran and had a meeting with Hazrat-e-Imam Khomeini also wrote a book. The American government was annoyed with him for his impartiality towards the Revolution. The Judge was deeply impressed by the magnetic personality of Hazrat-e-Imam.

*The Return of the Ayatollah*, a book written by Mohamed Heikal wrote a noteworthy book an Arab Egyptian author & writer/journalist...In the history of the twentieth and the 21<sup>st</sup> century, there is no doubt that the events of the last thirty years in Iran will be seen as central to its understanding, because they offer a paradigm of the hopes, ambitions, follies and miscalculations which have plagued the world. Heikal's analysis is worth reading.

My teacher Dr Waheed-uz- Zaman wrote the book, Iranian Revolution, a profile. Despite disagreements these books stand a remarkable addition and change in the political literature of the world.

There is a long list of monographs and books written by the Americans but they fail to understand the Revolution. Most of the books written by Americans, despite their painstaking research, labor are unable to fathom the depth of spiritual power and the wisdom of the Revolution. The foundation of these researches is Capitalism while the foundation of the Revolution is deeply imbedded in the infallibility of the Prophets. Thus the Western scholars can achieve the wisdom of the noble thoughts of Hazrat-e-Imam.

*"Africa is to be the first Islamic continent"* is a well-used Islamic echo in countries of the Continent of Africa. The Iranian Revolution has also served to reconfigure the politics of the Middle East and marked a crucial moment in the emergence of true revolutionary spirit of Islam. The Islamic Revolution of Iran with its center truly called *Sangar-e-Sheeran* reflects the aspirations of Muslims across the Middle East and in fact beyond- all the Muslims who had felt humiliated and frustrated by their bitter experiences with the materialistic Western Civilization. As such, it inspired and emboldened the forces of Islam, particularly as Iran appeared to offer a specifically Islamic model of political and social development free from western hegemonic influences. Iran's wider influence was demonstrated in November 1979 when Iranian students seized the US embassy in Tehran, and by the sprouting in 1982 of the Hezbollah in Lebanon. Together with Iranian influence both Hamas and Hezbollah pose a major real threat to Israel. Iran's regional position has also been significantly strengthened by the overthrow of Saddam Hussein in 2003 and the establishment of a majority Shi'a government in Iraq.

Islamic Republic of Iran emerged as a spiritual superpower of the world after its unprecedented victory of the blood over the western technology and the collective might of *Taghut*. Gradually Iran now has strengthened in the field of scientific The anxiety of the Western civilization with its torch bearer, the United States is that Iran is gradually strengthening pan-Islamist regional rather Global leader— The Iranian cultural influence in Afghanistan pre-dates the Islamic Revolution of 1979 as linguistically, Persian and the Afghani version of Persian (Dari) is very strong in Afghanistan. **The impact of the Islamic Revolution has a deep multifaceted impact on the global political literature and culture of the world.**

**Iran dominates the US geopolitical agenda due to the Satanic fears that Iran is the only real free and truly independent Islamic country around the world.**

**Since the Islamic Revolution political, geostrategic and cultural literature of the world has significantly changed.**

The word Revolution is used but not understood in the real sense of the world in so many Muslim countries. The word *Inqilab* is frequently used by most of the Pakistani politicians these days but the soul of the revolution is missing. Similarly the

#### **The Leader:**

Tall handsome with a face as innocent as a child despite his growing age, the personality of Hazrat-e-Imam deeply impressed me when I saw him in Jamaran. The day became one of the most significant day of my life. His death was an international loss globally felt by all peace loving people around the world. Almost every Muslim country wants to undergo a Revolution but where is the leader? Give me a personality like Hazrat-e-Imam and I will give you the Revolution!! The Arab spring suffers from lack of a revolutionary leader. Defeating CIA in Pakistan, Egypt, Libya, Afghanistan, UAE, Turkey and so many other countries is not a joke.

**The Revolution has deep roots within my immediate surroundings and within my own family. I have deep personal experiences of the Revolution. I participated in the *Jumaa-e-Khooneen* Demonstration in Makkah and am alive despite the firing by the plainclothes intelligence agents. I published an article on this in the Herlad, Karachi. It was translated and published in *Jamhoori-e-Islami* newspaper from Tehran.**

**My students visited Iran and they did not understand the value of Hijab before their visit to Iran but when the girls came back from Iran they had Islamic *Hijab* and thus there is a permanent positive change in their social behavior.**

The cultural influence of the Revolution is Regional, extra-regional and in fact global. The Revolution has successfully combated Huntington's "Clash of Civilizations" with positive universal ideas of versus Dialogue between Civilizations. Invitation of the Americans to Ayatollah Khatemi was a confirmation of the American intelligentsia to accept the superiority of the Iranian idea. There is no doubt about it that the Revolution's cultural impact is Global and its political literature is becoming universal. The Impact of Iran on the neighboring countries is increasing and strengthening with the passage of time. American political hegemony is weakening and American culture in the Muslim World is weakening. Iran vows to go ahead with pipeline project despite American opposition.

The literature of *Islam-e-naab-e Mohammadi* is spreading across the globe by the Iranian Cultural Centers around the world which definitely has an impact and that is why the West is scared of Iran's Islamic Power because impact on Pakistan is increasing as the number of Shuhada in Paksitan has increased. Impact on Afghan culture is distinctly visible. Impact on global thinking is transparently visible. Before 1979 Islam had become an apologetic religion across the globe and ISLAMIC REVOLUTION introduced the real face of Islam. The concept of Bipolarity is dead.

Successes after successes have been achieved by the Islamic revolution. The Revolution's greatest enemy Saddam was eliminated by his greatest supporter, the USA. After the Imam wrote to the Russian leader that Communism will become a part of the museum, the prediction proved solid and decisive. The USSR, the so-called super-power disintegrated. Iranian efforts to spread Quraanic teachings in the Central Asian region have played a positive role in the death of Soviet model of Communism.

International changes due to the influence of Iran are so many that this brief essay insufficient to give all the details which should be compiled in the form of a book.

Hijab in the West by Muslim ladies is increasing and becoming more popular. Hijab in the Muslim Countries is also becoming more in vogue. Saddam's elimination from the political system of the world was a positive development for the Iranian revolutionaries.

Kuwait became apologetic to Iran for helping Saddam. The USA becomes exposed after the Islamic Revolution.

The revolution tears away *Niqab* from the face of the West:

1. Role of Iranian culture centers in the World.
2. Role of embassies in the world.

3. Influence of Iran in South America.
4. Role of Iran in Muslim Unity.
5. Role of Iran in dissemination of knowledge.
6. Role of Iran in support of the liberation movements.
7. Iran's role in the spiritual globalization of political aspect of Islam.
8. The successive establishments of the USA are deeply nervous due to the global impact of Islamic Republic of Iran
9. Iran has taken great strides in research and scientific development.
10. Iran & global Islamic professorial movement have taken positive steps recently.
11. Iranian leadership's role in exposing *Taghut* is crystal clear and revolutionary path is solidified.
12. Iranian leadership as an example for others: Simplicity, qualification, character, piety, status, magnetic attraction and bravery are widely quoted as exemplary by different strata of people in the Muslim world.
13. Iranian exemplary progress in the post-war period.( Metro, scientific inventions.)
14. Advancement in defense advancement and space technology.
15. longevity of life research
16. Women advancement in research and fantastic literacy rate to be followed by the rest of the Muslim societies.
17. Iran has become a spiritual superpower.
18. Iran's role in anti-Zionism is commendable and acknowledged by Muslims around the world.
19. Iran's vehicle factories have become updated and modern
20. Iranian print and electronic media is playing a wonderfully positive role with increasing TV channels with global reach.
- 29 Iran's agreements with poor countries are cementing bonds of friendships around the world including South American countries.
21. When I show films in my classrooms to the new generation, like Yusuf, Maryam, Sulaiman, Amir Mukhtar, so skillfully manufactured by the Iranian cinema industry, I have noticed that these movies have deep impact on the new generation of the Muslims across the globe. These are watched through Iranian TV, CDs and videos which are bringing the youth back to the serious and clean spiritual thinking which will have a deep impact in the long run. is a boost in fact.

Even enemies accept that Islamic Revolution had profound and inspiring effects on regional and international developments.

*Imam's personality:*

The revolution cannot be separated from its original founder-leader's, the Hazrat-e-Imam's magnetic personality. I saw him in 1980 in a simple broken chair in Hussainae Jamaran. Tall, strikingly handsome with a glowing innocence of a child on his face. His extremely simple habits and his incredibly sweet words entering an ear like honey and producing the desired effect. His physical death was an international calamity of paramount magnitude globally felt by all peace loving people. like Precisely today the biggest problem of the Arab spring is that it lacks a leader like Imam. The problem persists in Pakistan which lacks a revolutionary leader like him. Afghanistan Egypt, Jordan, Morocco, Muslim world is . Some of the politicians do not even understand the meaning of the Revolution while masses in these countries are looking forward for segregated changes in these Muslim countries which will be ultimately be culminated into a federal, confederal or unitary United States of Islam. political

**AA Velayati said in Karachi that bilateral cooperation would be strengthened in more areas which benefit the entire region.**

**Dr. Velayati said Iran and Pakistan could play key role in strengthening relations among all Muslim states. Bilateral relations between our two countries are expected to get a further boost after signing of the gas pipe project. The federal cabinet recently ratified the \$ 1.5 billion government-to-government deal with Iran for laying the 785 km Pakistan segment of the pipeline to deliver 750 million cubic feet of natural gas per day of Iranian gas by the end of next year.**

**The different research wings of the US which include the research projects of the US defense forces are trying their best (though they also accept their failure) to understand the** on ways to strategically negotiate and communicate with Iranians through a more informed cultural understanding. Colonel Eric J. Winkie U.S. Army War College  
122 Forbes Avenue

As an American writes "U.S. strategies to engage Iran have not been effective due to a lack of cultural understanding." Islamic culture is beyond the comprehension and understanding of many Americans. At the epicenter of this region is the state of Iran, historically known as Persia, which once was an impressive empire that predates the birth of Christianity, Alexander the Great, and the Roman Empire. In addition to occupying the geographic center of this region, Iran

wields a high degree of political power throughout and affects geopolitical events well beyond the region. One could argue that although Iran is not the center of gravity with respect to U.S. policy in the region, it plays a decisive role. In fact, Iranian internal and external behavior has significant second and third order effects on U.S. regional geopolitical goals and

However as this paper examines, historically U.S. strategies to engage Iran have not been effective due to a lack of cultural understanding.

Iran's tremendous economic efforts are evolving into better cultural and political influence in Afghanistan. Iran is developing commendable cultural relations with Afghanistan. Iran has succeeded in economic investment in Afghanistan with efforts aimed at educational, religious, and cultural influence in the country in recent years.

The United States of America hoped to have everlasting influence by naked invasion of Iran's neighbors that is Afghanistan and Iraq and now drone attacks in Pakistan's tribal area. But there is solid evidence that Iran's cultural influence in all these three neighbors has remarkable success and this Iranian success is an anxiety for the USA and its NATO allies. Iran's hard power as well as soft power has created considerable cultural, political and economic influence in Iraq. Arab Spring cannot be called a revolution yet but Iranian President's first ever visit to Egypt and top level Iranian visits to several Arab countries are a proof that pure Islamic cultural and political influence is developing in the entire Arab world. The learning of Arabic language in entire Iran is one of the tremendous successes in the Arab World through Arabic language.

The Syrian alliance with Tehran is likely to remain strong. Tehran-Damascus alliance is an eye sore to the Western Civilization.

Iran an unprecedented degree of influence in Iraq at the expense of the United States and of Iraq's Arab neighbors. Hezbollah has gained a great degree of control over the Lebanese government even as it has preserved its own state-within-a-state autonomy and separate armed forces. The collapse of Hosni Mubarak's regime in Egypt opened new opportunities for Iran, while uprisings among populations in the Persian Gulf countries are weakening potential Iranian enemies who are monarchic and dictatorial. Israel is now in the range of Iranian missiles which is a great source of strength for the Palestinians. There are indications that Tehran's relations with Jordan are improving significantly. Kuwait-Iran diplomatic relations are on the anvil of success. Iran and Oman have signed contract which is a great sign of improving relations. China-Iran relationship poses a significant challenge to international efforts to isolate. During the last three decades the Islamic Revolution has had profound impacts on regional and international equations and the wave of the Islamic Awakening in the last two years was the results of the efforts made by the great nation of Iran during the revolution. The greatest honor for Iran's Islamic Revolution is that it has pioneered other uprisings in the region and in our view, all the regional revolutions are indebted to Iran's Islamic Revolution and its leader," Palestinians are calling Iran as the greatest source of Islamic awakening.

The world is witnessing an Islamic spirit in the Arab uprisings which have the potential power to develop into revolutions in the coming years

He also stressed the spiritual influence of Iran's Islamic Revolution on the recent and current uprisings in the region, and added, "I would like to emphasize the point that we wouldn't have witnessed such revolutions and Islamic awakenings today, if an Islamic awakening had not taken place in Iran 32 year ago and if the Islamic Revolution (of Iran) had not achieved victory."

Late in April, Supreme Leader of the Islamic Revolution Ayatollah Seyed Ali Khamenei underscored the profound and vast influence of Iran's Islamic Revolution on the growing wave of Islamic awakening in the region, and voiced confidence about the desirable outcomes of the current popular uprisings.

As the goal of the Muslims is to have a truly united politically to integrate into a global, federal, confederal or unitary state is crystal clear. Some call it the United States of Islam with its capital in Makkah and its Senate in Madinah!
