Abstract:

During the recent few centuries and even after the period of the pure leaders his Eminence Imam Khomeini was the only leader and despite having many problems and conspiracies leaning on his Godly power and that could not be destroyed and using his particular leadership features he created such a motive among all of the world's Muslims especially different strata of the people and through that he became the source of great transformations in the history of Man.

In this research regarding that an effort has been made so that noting the special attention that his Excellency Imam has paid to the stratum of those attending universities to put forward modes regarding creation of motives for different strata particularly that of the universities as a model for leadership and management of Islamic societies and particularly those who are responsible for the universities while examining the views and ideas of that Eminence regarding knowledge and university.

Before examining motivation factors considering that goals and expectations of the individual and he or she creates the motive and that definitely places a major impact on the course of modes of motives; hence in the beginning I discuss and examine the expectations of his Eminence Imam from universities and then I study and examine the factors that create motivation.

Regarding that while studying expressions of his Eminence Imam in total I got 30 factors and they create motive in the casting of four general titles and they are religious, human, national and other cases and while pointing out some of those eloquent expressions I discuss and examine those factors in length.
