Abstract:

This research is the one that is with respect to the political and social values according to Imam Khomeini (peace be upon him) and finding a system that is of a value kind and also creating a measure among those values. In order to create that measure first I consider a conceptual framework and that is according to Almond and Powell and through performing adjustments I have highlighted my final conceptual framework. After highlighting my final conceptual framework, I have examined the dimensions and the constituents of that framework according to Imam Khomeini (peace be upon him).

Then referring to the sources of my research I have considered a value system for the dimensions and I have found that noting the constituents and those that introduce that and they have to do with those. In order to create the measure that I have considered first noting the dimensions, the constituents and those that introduce my research I have prepared a number of items and through referring to the views of the specialists I have specified whether they are related or whether they are not related to the constituents.

Then I have considered those items as those that are in 10 bits and they are of the measure kind and in the next process through an examination of the items and getting the interdependence coefficient and the power of separation and the thing that distinguishes the items I have found out their credit. Also, in order to highlight the stability of those bits of the measures I have found out Alfa Kronbakh in order to find the suitable items and in order to eliminate the items that are unsuitable. At the end I have considered the items that are left in a table as the measure of the political and social values according to Imam Khomeini (peace be upon him).

Keywords: Imam Khomeini (peace be upon him), the values, politics, the society
