## Abstract:

The praying and the worshiping are a close relationship between those who are created and the one that is the creator. The worshiping of God is one of the features of the Godly religions and the praying is the apex of all of the worshiping and the chosen prophets and the Shia Imams have always making their will have asked the people to do those two. After the prophets and the godly guardians using the counsel and the thoughts concerning the praying secrets is a task carried out by the innocent role models who attended the friend's feast and through diving in the endless ocean of the Godly knowledges have given the shell of the history that has no spirit a new soul. Also in Imam Khomeini's thought praying has a very suitable position; based on that this thesis examines the subject of finding the root of the mystical source of his Excellency Imam Khomeini (peace be upon him) concerning the view of the Quran and the narratives in the thesis Serolsoluh.

**Key words:** *Imam Khomeini, the mysticism, the Quran, the Hadiths, the pray*
