The theoretical foundations of each thinker have roots and basis in various fields of knowledge.

This is because epistemological thoughts come from thinking attitude of scholars and intellectual towards the world and the surrounding issues.

While conduction research about a theory or an idea, its principles and foundations, which are usually outside the scope of that idea, are of great significance because they constitute the basic foundations of that idea.

This is especially important in the case of the founder of Islamic Republic Imam Khomeini, who with his own vision challenged contemporary politicians.

Now in this research, we would be enumerating the most important political ideas of Imam Khomeini.

But we also intend to further explore the theoretical foundations of those ideas which pay deep attention to piety, the tradition of the Infallibles and the core of reason.

Keywords: *Imam Khomeini, political thought, theism, tradition, the Infallibles, core reason*
