University: Faculty of Humanities at Shahid University

Abstract

In this dissertation, the author has undertaken extensive efforts to comprehend and make readers understand the scientific biography of Imam Khomeini and theological works he has left as precious academic inheritance.

Imam Khomeini, who had had a well command over a range of Islamic disciplines and authored philosophical, mystical, Hadith, Quranic and theological works, can be adopted as a role model for a scientific and academic life.

And to support this purpose, we have attempted try to provide the documents and books about Imam and his scientific life which are of great worth and have left lasting impact.

Keywords: *Imam Khomeini, scientific life, educational life*
