Abstract:

The university is an organization in the country that can place influence on what there are and it plays a role and it has a responsibility in the society and nothing else is like that. Based on that Imam Khomeini (peace be upon him) has paid a lot of attention to this subject and vis-a-vis such a sensitive and such an important matter he has put forward the idea of having the Islamic universities and until today that has not lost its being a certain subject. Also that idea is related to many scientific and cultural policy-makings such as the software movement, the big change regarding the sciences that have to do with the human beings, the naturalization of the sciences and the making of the Islamic-Iranian civilization and therefore this research focusing on the subject and that is with respect to the idea of having the Islamic universities and examining and analyzing that according to Imam Khomeini (peace be upon him) and through using the descriptive- analytical method it has provided the necessary information through library studying and through examining the documents in order to examine the concepts and in order to analyze them. Thus this research answers this principle question and that is what are the concept and the substance of the Islamic university and what are its indicators according to Imam Khomeini (peace be upon him)? And this research through having an analytical method makes an effort to prove a hypothesis and that is that Imam Khomeini (peace be upon him) having an approach that has to do with the society puts forward the concept and the substance of the Islamic university based on a naturalized and an Islamic view on one hand and the increase concerning the efficiency of the university and that has to do with solving the problems of the country.

Key words: *Imam Khomeini, the Islamic university, thought and ideals*
