## **Abstract:**

The management of the general affairs of the human society takes place through the ruling organization or the political system. The most of the theoreticians have examined and have thought about how the establishment of legitimacy and the continuing of the preservation of the system and here the survival and the preservation of the political system concerning Imam Khomeini's thoughts are exquisite and new tasks. The effort that is made by this matter thesis is to examine the logical results of the preservation of the system according to Imam Khomeini in that field. Imam Khomeini's thought generally and his political thought particularly are influenced by epistemology, getting to know the world of being and anthropology and they form the bases of his philosophy and those bases select the limit and the subsidence of his political thought. That which has been said about the results of this thesis enable me to express this that the necessity of forming and founding and preserving the Islamic rule are among the bases of Imam Khomeini's knowledge and his ontology and they are completely different from the West's results that have to do with knowledge and humanist getting to the world of being and the other thing is that politics are parts of religion and they cannot be separated from that and according to Imam religion without politics is not religion. According to Imam politics and the rule are guided by principles such as Tawheed, prophecy, resurrection, justice and leadership but those principles for the purpose of implementing the need for politics and the ruling and without politics and the ruling having status cannot be implemented and they remain as things that are stranded and things that have not been implemented.

Hence the implementation of those principles depends on the establishment of the rule and politics, According to the items that have been mentioned the preservation of the system according to Imam Khomeini is one of the more mandatory things that are mandatory and under any circumstances and whatever may be the price that should be taken into account and all of the software and hardware facilities of the country should be employed regarding that. That subject is an important theory and according to Imam Khomeini the protection of the Islamic system is more mandatory than the protection of the life of the innocent leader.
